This our syllabus for the Pilotage weeks, they are loosely flexible, if you've done a Siv course before and say want to practice full or stable stalls, Sats & wing overs then we can substitute any of the following.

We've chosen a program not to packed with manoeuvres so that you get the opportunity to practice and gain confidence with them. You can always come back and practice more. Don't see Siv as a box to tick more an opportunity to learn and refine.

- **Day 1** - Tow theory, practise tows on field, equipment check
- **Day 2** - Pitch pendulum, Rhythmic turns, Turn reversals
- **Day 3** - Big Big ears, A-symmetric Deflations
- **Day 4** - A-symmetric Deflations with speed Bar and Symmetrics
- **Day 5** - Search for spiral, entry and exit
- **Day 6** - go flying!

Fly Spain provide

- Gas inflatable life jackets (there's is a 25 euro refill in event of you putting them in the drink)
- Bridle cutter
- Radio pouch but not 2 mtr radios (available to hire)
- Accommodation
- Airport transfers as per usual
- Transport around flying sites and lake

You will need to bring

- Glider
- Fitted reserve, ideally recently repacked
- Harness
- Radio
- Helmet
- Travel insurance
- If your a Brit E1.11 health card
